## Ejector Trailers

- 70 CuM to 97 CuM (90 CuYd to 126 CuYd)

## Standard Features

- Fabricated from top grade high tensile steel
- Designed with strength and payload in mind
- Rear lights protected from damage
- Lower centre of gravity for safety
- Full width chassis & axle track for stability
- 2 pac paint finish for protection
- EBS braking system with full data-logger feature.
- Substantial top rail to prevent side wall deformation
- Side uprights spaced at 500mm (20") for extra strength
- Hardox 400 grade floor sheets (optional).

## Options

- Engine Power pack / VM / Lombardini / Hatz
- 1/2 net manual/hydraulic sheeting system
- 1 piece hydraulic sheeting system
- Payload weighing system
- Nameboards for livery
- Lifting axle with auto drop feature
- Roll stability program for extra safety.

## Controls

- Manual / Pneumatic over hydraulics / In-cab controls
- 2 handed rear door controls to PM 52 Standard
- Remote control option for all functions.

### Leak-proof Trailers

A trailer to transport not only general waste but also dry mix recyclables and organic food waste. The trailers are entirely leak-proof up to 300mm above the floor and also have a tank mounted underneath the rear of the trailer to capture any leachate coming from the waste, ensuring that no liquid from the load is escaping and polluting the loading area or the highways.

### Mobile Transfer Trailers

43m<sup>3</sup>, with Alpha-III rear self loading tailgate. For transport of co-mingled recyclates, domestic refuse, green waste and organic food waste. Reduce the need for vehicles to have to return to depot and tip load by loading to the Mobile Transfer Trailer first.

### Fast Floor Trailer

The revolutionary FastFloor discharges the load in under 3 minutes whilst still retaining full ejector features and push-off at landfills. The FastFloor also takes a payload up to 25 tonnes at a 44 tonne GVW while there is a significant reduction on floor maintenance whilst still maintaining a hardened steel floor capable of handling all waste.

### Standard Ejector Trailer

The strongest, most durable Ejector trailer on the market. Built with a decade of design experience making the bmi Ejector the premier product for all bulk haulers. Also available the bmi Lite, a variant with the same all steel construction including design utilising lightweight high performance components but still guaranteeing the robustness of the original design.
